**Subject:** Public Records Request

Mr. Tipton, I am seeking the information below under the Freedom of Information Act.

I have attempted to obtain what I was looking for through the county's public online records system, but I am unable to obtain many of the documents I am seeking and the level of detail I am seeking on most of the others. I would appreciate it if you could make the following available for me at your earliest convenience:

- 1) All invoices from vendors providing cellular telecommunications services for the last three years.
- 2) All invoices from vendors providing voice telecommunication services; i.e., copper phone lines, T1s, PRIs, etc. for the last three years.
- 3) All invoices from vendors providing data telecommunications services; i.e., MAN, MPLS, T1, PRI, DSL and Cable data/Internet connections for the last three years.
- 4) Copy of network diagrams for Brevard County and all facilities for which the Brevard County IT Dept supports/bills.
- 5) Breakdown of annual personnel/payroll costs in dollars as they relate to the county data network versus voice communications; i.e., how much personnel and dollars is dedicated to maintenance of the data network and how much dedicated to the phone system.
- 6) Copies of all current data and voice equipment support/maintenance contracts and dates of expiration/renewal for each.
- 7) Copies of all current contracts and/or term agreements with any of the vendors from lines two and three of this request with expiration/renewal dates for each.

If you can put it all on CDs or a DVD that would be great - no need to waste a ton of paper. I will pay the requisite fees for the media. Please call me at 321-626-9791 with questions. If you could give me a timeline as to when the information will be available it would be greatly appreciated.

Thanks for your help!

P.S. - I hope your move is going well and you are getting settled in nicely :>)

Sincerely,

Matthew D Nye
